

## SICOSIL® SICO-F813

## 1H,1H,2H,2H-perfluoroalkyltrimethoxysilane

## Chemical structure:

## Typical physical properties

|                                      |   |
|--------------------------------------|---|
| Product No.:                         | SICOSIL® SICO-F813  |
| Chemical name:                       | 1H,1H,2H,2H-perfluoroalkyltrimethoxysilane                        |
| CAS No.:                             | 85857-16-5  |
| EINECS No.:                          | 288-657-1   |
| Formula:                             | C <sub>11</sub> H <sub>13</sub> F <sub>13</sub> O <sub>3</sub> Si |
| Appearance:                          | Colorless transparent liquid                                      |
| Refractive index(n <sup>25</sup> D): | 1.3300~1.3400   |
| Purity:                              | 97%   |

## Applications:

SICOSIL® SICO-F813 is a raw material in area of anti-reflective coating, release coating, soil-repellent coating.

## Packing:

210L Iron Drum: 200kg/drum

25L Container: 25kg/container
